

GFD Finaeon SOLUTIONS

An Advanced Analytics Platform

GFD Finaeon enables users to choose from a vast cross section of GFD's unparalleled data while performing complex mathematical analysis. Driven by financial and economic historical data, with some data sets extending back over 1,000 years, GFD Finaeon gives you the power to identify hidden opportunities that will maximize your returns.

Search individual or lists of symbols

Use the GFDUniverse search tool to search by individual symbol, type a list with commas separation, or upload a .csv file.

New "Recent Results" list.

Gather multiple search results into a "recent Results" list, that you can run charts on, download or save to portfolios (coming soon).

GFD Finaeon SOLUTIONS

GFD Finaeon Tree

Easily search Main Indicators like fixed income rates, government debt, etc as well as tools for Yield Curves, CAPE Ratios and MORE!

NEW Charts and Graphs

All-New charts are interactive, with pan and zoom (drill down) controls and a big increase in rendering speed.

Charting Options

Comparison Charts, Technical Indicators, Financial Ratios, and Historical Overlays are among many new improvements.

Analysis

Financial charting capabilities including Candlestick, Mountain, Open-High-Low-Close (OHLC) and long-term trend analysis.

On-Demand Downloading

No more queuing. Downloads are performed on demand with real-time status displayed.

Download Options

Choose stacked or pivoted data, include fundamental data, and many more options in just a few clicks.

API

Use GFD's Application Programming Interface – API – to automate and download large datasets.
